

FUNCTIONAL OVERVIEW

M-Files QMS is a flexible, scalable out-of-the-box solution for quality management.

Organizations operating in highly regulated industries seek a balance between maintaining compliance and usability.

M-Files QMS takes the next generation of enterprise information management (EIM) and provides a rich set of features to ensure that all quality documents, data, and processes are linked together within a single, compliant and easy-to-use system. This enables organizations to optimize quality processes and provide evidence of the efficiency of the quality system for auditing purposes.

"If you do ISO 9001 manually, the additional paperwork is a pain, but using M-Files, its trivial" - Howard Loewen, President MicroPilot

M-Files QMS Helps Your Organization:

- Improve operative performance and customer satisfaction
- Integrate risk management and quality capabilities into daily business practice
- Meet requirements for regulations and standards such as ISO 9001, HIPAA, Sarbanes-Oxley, FDA 21 CFR Part 11, and several GxP regulations including EU GMP Annex 11.
- Manage all information related to the quality system
- Automate quality processes like risk management, change control, CAPAs, and training while verifying that procedures are followed
- Ensure smoother and more efficient internal and external audits
- Reduce risks of financial loss, fines from regulatory agencies, missed timelines, safety issues or damage to you company' s reputation

M-Files Provides a Practical Set of Tools for Integrated Compliance and Quality Management:

- An easy to use, single solution for all quality processes
- Control your content with a single, centralized repository for all documents and emails
- With robust out-of-the-box functionality this comprehensive solution allows organizations to manage quality related documentation, tasks, processes and responsibility
- Native apps for desktop and mobile provide optimal user experience for each device type

"Our company is audited throughout the year, from customers conducting quality assurance inspections to our quarterly financial audits--and with M-Files, we spend far less time administrating audits." - Tyler Lassen, Idaho Milk Products
